

Multi-faceted educational provision
for students with Specific Learning
Differences (SpLD)

AchieveAbility

Dyslexia • Dyspraxia • Dyscalculia

Developed from the AchieveAbility Aimhigher National Project, the AchieveAbility Network seeks to engage and work with staff and organisations to promote awareness and meet the needs of learners with SpLD across the educational sectors.

UNIVERSITY OF WESTMINSTER

The purpose

The purpose of the AchieveAbility Network is to ensure: appropriate learning opportunities to enhance the continuation rates of SpLD learners across the sector and facilitate the attainment of these learners. To this end it will initiate and participate in discussion, research and develop projects in order to mainstream equality and access issues related to the educational involvement of SpLD learners.

Network objectives

- To share and disseminate best practice and information across the educational sectors
- To undertake collaborative research to bring value to the learning environment
- To promote staff awareness and provide training programmes
- To explore professional and political issues which will promote SpLD learner continuation across sector
- To lobby on and promote effective policies and systems to assist SpLD learner attainment
- To develop materials to support widening participation and teaching and learning for SpLD learners
- To highlight key issues that reduce the effectiveness of SpLD learners in their learning
- To identify and engage in proactive initiatives and comment to support SpLD learner attainment

What is available?

(including some examples of contents):

- **Information – Advice and guidance**
 - **CD ROM**
Information on SpLD and entry into HE
 - **Website www.achieveability.org.uk**
Activities and partner information, useful links
 - **Research**
